

**arm protector / protective armsleeve, HPPE**

The PRO FIT® arm protector "Arm Gard" combines cut protection of the highest level F with pleasant wearing comfort. The high-performance yarn "SteelFiber", a combination of HPPE fibre with a wafer-thin steel thread, gives the forearm protector an extremely high tear strength and cut resistance and is flexible, light and soft at once and therefore comfortable to wear.

The grey/white pulse protector is 25 cm long and is fastened with an extra strong velcro below the elbow. This ensures optimum hold without slipping and offers reliable protection against cuts on the forearm.

The "Arm Gard" from PRO FIT® can be combined with protective gloves and additional protective clothing.

Article-No.: 7725

Product details: arm protector / protective armsleeve, HPPE
45cm, with velcro

Colour: black / grey

Size: 25 cm

Packing Units: 5 Paar / 50 Paar

Gauge: 13

Type of production for liner: Knitted

EN 388:2016

- Resistance to abrasion: 3
- Blade cut resistance: X
- Tear resistance: 4
- Puncture resistance: 1
- Blade cut resistance ISO: F

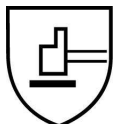

Liner: High Performance Poly Ethylene
Steel fibre

Industry: Craftsmanship / Manufacturing industry
Heavy industry
Light industry

Production method of liner: Cut protection

Eigenschaften: Especially breathable
SteelFiber

EN 388:2016

3X41F
