

**work socks,**

The PRO FIT® work sock made of bamboo combines perfect foot climate with excellent wearing comfort and perfect fit. The work socks are made of 53% bamboo viscose and therefore have an absorbent effect. Moisture will be transported away from the soles of the feet. Furthermore, bamboo is bacteria repellent, which prevents foot odour. Bamboo socks have a cooling effect, which means they can be worn in closed shoes even in warm temperatures. The viscose made from bamboo pulp is not only robust, but also pleasantly soft and flexible, making it particularly comfortable. The black and grey sock with turquoise details adapts perfectly to the shape of the foot. The flat toe seam runs over the front end of the toe for a great feel and perfect fit.

Available sizes: 35-38, - 39-42, 43-46

**Article-No.:** 94

<b>Product details:</b>	work socks, normal size
