

Class 2

High Visibility T-shirt,

The high-visibility T-shirt offers warning effect and UV protection in one. The high-visibility clothing is certified according to EN ISO 13688:2013 (general requirements), EN ISO 20471:2013+A1:2016 class 2 (high-visibility protection) and EN 13758-2:2003+A1:2006 (UV protection 40+). In supplementary, official tests, the material even demonstrated a UPF (UV protection) of 50+. The testing was carried out under 25 washing cycles, and the UV protection was maintained. #The laminated, segmented reflective stripes (all around the body, arms as well as over the shoulder areas) are stretchy, seamless and therefore do not constrict even in small sizes. #The innovative lyocell fiber makes the inside of the garment particularly soft and comfortable. The material made from natural raw materials also ensures low bacterial growth, is odor-resistant and sweat-absorbent. #The TENCEL™ brand lyocell fibers are produced from sustainably sourced natural raw material wood in an environmentally conscious manufacturing process. The botanical origin of TENCEL™ cellulose fiber defines a new standard in sustainability. The material is OEKO-TEX® certified and particularly suitable for allergy sufferers. #The V-neck and sleeves are finished with color-contrasting knit cuffs. A patch pocket provides secure storage. Personalization: #The printable area for this item is: Background material: 0.17m² (e.g. up to 25cm x 30cm front and 25cm x 30cm back) A serious advantage if a personalization is desired without affecting the warning effect.

Article no.:

2111

Coating description:

 High Visibility T-shirt,
hivis yellow, UV Protection

Size:

3XL, 4XL, L, M, S, XL, XXL

Packaging units:

1 piece, 25 piece

Grammage:

180

Washing care instructions:

40°C - delicate cycle (with one bar at the bottom)

Bleach care instructions (tri-angle):

Do not bleach! (empty crossed-out triangle)
