

Händedesinfektionsmittel

For hygienic and surgical hand disinfection. For skin disinfection before injections and punctures. □Comprehensively effective against bacteria, yeast fungi and enveloped viruses. It has limited virucidal PLUS activity. Particularly skin-compatible and lipid-replenishing, increases skin hydration with regular use, excellent tolerability even with long-term use, outstanding immediate effect, free of dyes and perfumes. #Hand disinfection is used to specifically prevent the transmission of infections, e.g. in nursing. #Do not bring into contact with open flames. Do not use near sources of ignition. Flash point 23 °C, flammable. Fire and explosion hazards are not to be expected if the preparation is used as intended. After spilling the disinfectant, take the following measures: immediately absorb the liquid, dilute with plenty of water, ventilate the room and eliminate sources of ignition. Do not smoke. In case of fire, extinguish with water, extinguishing powder, foam or CO₂. □Pharma-Z.Nr. 04817465. Hartmann.
