

Bump Cap "X1-9500 Pro Cap",

Airlite PRO Base-Cap is a bump cap that protects against bumps and minor lacerations. At the same time it is fashionable, very light and comfortable to wear. The base-cap is certified according to EN 812. The ergonomic protective shell made of high-density polyethylene is removable and offers good protection. The cap has an excellent ventilation system, as well as a pleasant wearing comfort thanks to the anti-shock foam padding as well as the soft sweatband. There is reflective material on all sides of the bump cap for 360° visibility even at night. The elastic strap allows the cap to be easily adjusted to the head size 54-64 cm by clip. #• Provides protection in industry in accordance with DIN EN 812:2012 #• Ergonomically shaped protective shell #• Excellent ventilation system #• Excellent wearing comfort thanks to anti-shock foam padding #• Reflective material on all sides for 360° visibility #• Elastic strap to adjust to head size #• Sweatband adds comfort and absorption for the wearer #• Outer material 100% polyester – washable at 40°C
